## 100% Regain Stabilized Nitrogen

A granular Stabilized Nitrogen fertilizer      Regular particle size

### GUARANTEED MINIMUM ANALYSIS

|                      |                    | %    |
|----------------------|--------------------|------|
| Total Nitrogen       | (N)                | 17.0 |
| Soluble Potash (SOP) | (K <sub>2</sub> O) | 5.0  |

### PRODUCT FEATURES

100% of the nitrogen is from Regain stabilized nitrogen. Regain prevents the loss valuable applied nitrogen through the air and soil by controlling the enzyme (urease) that causes ammonia volatilization.

### TURF BENEFITS

**Efficient** – Regain when compared to untreated urea nitrogen prevents the loss of up to 50% of active product through volatilization and leaching.

**Effective** – Regain products have demonstrated in University turf studies to produce statistically greater colour than traditional urea/SCU fertilizer blends, even at substantially lower rates.

**Use Less** – Regain products produce results at 20% - 30% lower rates.

**Environmental Leadership** – This product leads to less nitrate runoff in waterways and less ammonia and greenhouse gas emissions.

**Cost Savings** – Delivers benefits at lower application rates which decrease fertilizer costs over similar areas of application.

*"Averaged over the entire season, Regain had statistically greater colour than SCU/Urea fertilizer, even though the Regain product was applied at a substantially lower rate." - Dr. Doug Soldat, University of Wisconsin*

Recommended Application Rates: 1.5 kg/100m<sup>2</sup> or 3 lb/1000ft<sup>2</sup>
